FAIRE PRODUKTION,

FAIR PRODUCTION, **FAIR PRODUCTS**

All LOWA footwear products are completely "Made in Europe". The Jetzendorf company with the long tradition assumes a special responsibility for its production locations and shares a philosophy that the International Labour Organisation once expressed in the following way: "A market governed by a fair alliance of rules and institutions is more efficient and operates for the benefit of everyone." The aim is to ensure that production partners understand the need to apply ethical standards at the European locations, standards that include the guarantee of adequate wages for employees, compliance with important aspects of occupational health and safety law and observance of social standards. This overview of LOWA's production sites delves into the essence of this strategy and illustrates why LOWA believes the words "Made in Europe" represent a holistic way of thinking.

ALPINE

A person is rappelling down a steep, rocky mountain face. They are wearing a pink jacket, yellow pants, a white helmet, and a large blue backpack. They are holding a rope and a carabiner. The background is a misty, mountainous landscape with a small building visible in the distance.

GERLINDE KALTENBRUNNER_LOWA PRO Team

ALPINE

WEISSHORN GTX®

Größen_size: UK 6 – 13

Gewicht_weight: 1950 g/Pair_pair

Sohle_sole: Vibram® „Dolent“ - Alpine

220029 3198 beere/schwarz_berry/black

ALPINE PRO GTX® Ws | APPROACH PRO GTX® LO Ws

NO WAY JUST FOR MEN.

Women are just as ambitious on alpine terrain as their male mountaineering counterparts. So they also need footwear made just for a woman's foot. To that end, both the ALPINE PRO GTX® Ws and the approach shoe APPROACH PRO GTX® LO Ws are made with a special women's last and do not fall one iota short of the men's models when it comes to comfort, fit and technical performance.

ALPINE PRO GTX®

PREDAZZO GTX® Ws	X		X	X				X	X			X	X	X			

VIBRAM® „MULAZ“

- mittlere Profiltiefe für beste Reibungs- und Tritteigenschaften am Fels, ideal auch für kombiniertes Gelände
- „Climbing Zone“ an der Sohlenspitze für präzises Antreten
- hinterschnittene Absatzfront für sehr gute Griffigkeit
- medium tread depth for the best friction and step characteristics on rock, ideal also for combined terrain
- “Climbing Zone” at the tip of the sole for precise stepping
- undercut heel front for excellent grip

VIBRAM® „MASAI“

- exzellente Griffigkeit auf allen Untergründen durch selbstreinigendes Bergschuhprofil
- grobe Brems- und Abstoßstollen
- hinterschnittene Absatzfront für Grip beim Bergabgehen
- „Climbing Zone“ an der Sohlenspitze
- excellent grip on all surfaces thanks to self-cleaning mountaineering tread
- rough braking and repelling studs
- undercut heel front for excellent grip

(außerdem_in addition: LOCARNO GTX® QC Ws | STRATO EVO LL MID | STRATO EVO LL LO | STRATO EVO LL LO Ws)

OHNE WENN UND ABER **MULTIFUNKTIONAL.**

Wer sich nicht so recht entscheiden kann, ob es bei einem kurzen Spaziergang bleibt oder die Runde um den Block am Ende doch zu einer längeren Wandertour ausgedehnt wird, sollte sich von Anfang an alle Optionen offen halten. Mit den trendigen Modellen LOCARNO und STRATO sind spontane Ausflüge ab sofort nicht mehr nur die Ausnahme, sondern an der Tagesordnung. Dafür sorgen der lässige Look und funktionale Details für den robusten Outdooreinsatz.

TOTALLY MULTIFUNCTIONAL, NO IFS, ANDS OR BUTS.

If you can't really decide if it'll just be a short walk, or the jaunt around the block ends up turning into a longer hiking tour, you should leave yourself open to all possibilities from the start. Now, with the trendy LOCARNO and STRATO models, spontaneous outings from here on out will not be the exception but rather the rule. A casual look combines with performance details that ensure durability for outdoor use.

LOWA „CROSS II“

- hiking-oriented tread with a special adjustment of tread elements
- very good grip and traction on different surfaces

LOWA „HYBRID TRAC®“

- outdoor-oriented tread
- self-cleaning sole concept
- special tread design at the toe and heel for improved traction on uphill and downhill

LOWA „VIALTA III“

- stable and non-slip rubber outsole
- outdoor-oriented tread ideal for many different outdoor activities

VIBRAM® „EVO“

- ensures stability and non-slip performance
- outdoor-oriented tread
- optimum cushioning

VIBRAM® „EVO TRAC®“

- outdoor-oriented tread
- very good grip and traction on different surfaces
- special tread design at the toe and heel for improved traction on uphill and downhill

ALL TERRAIN SPORT

A man and a woman are wading through a shallow, rocky river in a lush forest. The man, on the left, is wearing a dark shirt, orange shorts, and a large backpack. The woman, on the right, is wearing a dark tank top, shorts, and a green backpack. They are both looking towards the camera. The river is surrounded by dense green foliage and trees, with sunlight filtering through the leaves. The water is clear and shallow, revealing rocks on the bottom.

LOWA „URBAN“

- flat, street-oriented TPU outsole
- modern and flat tread design for optimal traction
- weight optimised

LOWA „SANDAL“

- outdoor-oriented tread design
- optimal traction in offroad terrain
- optimized rubber compound

LOWA „SUMMER TRAVEL“

- GORE-TEX® SURROUND™ technology
- sneaker sole tread for optimal grip and excellent rolling characteristics
- abrasion resistant and flexible TPU outsole

ROBIN GTX® LO | ROBIN GTX® QC

EASILY READY FOR **SMALL ADVENTURERS.**

What really makes a good children's shoe or boot? It must support the foot ideally, must not limit its growth, and must be as durable and as long lasting as possible. On top of that, footwear like the ROBIN GTX® would not take little hearts by storm if it weren't also waterproof and allow speedy on and off with the innovative Speed Lacing system.

- MONOWRAP® sole construction with stabilizer
- ensures stability and guidance
- outdoor-oriented tread for excellent grip
- optimum cushioning

VIBRAM® „RENEVO JUNIOR“

- MONOWRAP® sole construction with stabilizer
- stable and non-slip rubber outsole
- outdoor-oriented tread
- ideal for many different outdoor activities

Lasts

NARROW
LAST

S-LEISTEN (SCHMAL)

Less roomy to accommodate a lower-volume, narrower forefoot.

WIDE LAST

W-LEISTEN (WEIT)

Extra roomy to accommodate a higher-volume, wider forefoot.

WXL LAST

WXL-LEISTEN

Expanded toe box combined with more volume at the metatarsals.

+EXTRA SIZES

EXTRA SIZES

This footwear also comes in an extended size range. Cemented footwear (Alpine, Backpacking, Trekking) has different soles and a different price. Details are available by consulting with the price list.

Outsoles

VIBRAM®

These outstanding soles and rubber blends offer impressive traction on various surfaces and, at the same time, optimal abrasion resistance. Vibram® has always stood for premium, slip-resistant, long-lasting soles and has for years been the market leader in this segment.

VIBRAM® ARCTIC GRIP

The combination of a winter-optimised rubber compound for dry, icy conditions and the unique patented Arctic Grip Polymer for wet, wintry surfaces makes this solution an outstanding companion all winter long.

VIBRAM® XS-GRIP

Proven climbing rubber for secure footing, precision, grip and optimised abrasion resistance.

LOWA RUBBER OUTSOLE

Conceived and developed by LOWA, this rubber outsole varies in its rubber blend has a tread design with varying lugs, both factors based on intended use. The advantage is a rubber outsole with good traction in the backcountry and off trail.

Outsoles

LOWA TPU OUTSOLE

Conceived and developed by LOWA, this TPU outsole has a tread design with varying lugs based on intended use. TPU's advantages include excellent abrasion resistance, better flexion, and the ability to use thinner and lighter outsoles. That is due to the need to use less material, resulting in better flexibility.

LOWA PU OUTSOLE

Conceived and developed by LOWA, this PU outsole has a tread design with varying lugs based on intended use. This outsole is used in particular for children's outsoles because it offers a good blend of lightness and abrasion resistance.

LOWA G³

Designed specifically for winter use with fibre elements in the lugs, this sole uses a rubber compound and performance sole design optimised for perfect grip, especially on icy or slick surfaces.

Outsoles

LOWA G+

This rubber compound developed just for winter has textile components, ensure that sure-footed safety and grip when it is icy and slick underfoot.

CLIMBING ZONE

This flat support zone under the toes makes easy scrambling possible thanks to a more secure foot placement.

RESOLEABLE

LOWA can resole this product for an additional fee.

Midsoles

SINGLE INJECTION

This manufacturing method of injection moulding offers the highest precision with a direct and solid connection between the sole and the upper.

DOUBLE INJECTION

Comfort and cushioning is further improved for specific uses with a complex injection-moulding process using a layering process.

FIT FRAME

The shell-like construction of the sole envelops and secures the foot to provide optimal fit.

SUPPORT FRAME

A higher wrap web construction gives the user good support for off-trail and backcountry use.

STABILITY FRAME

A sturdy wrap sole construction extending onto the upper ensures good stability.

Midsoles

LOWA DynaPU®

A LOWA-exclusive development. Optimised PU foam (polyurethane) for outstanding cushioning and rebound attitudes.

ANATOMICAL FIT

The anatomical shape of this carbon fibre insole wrapped in PU foam provides natural arch support that translates into a supportive fit and feel.

CLOSE TO THE ROCK

Our close-to-the-rock technology is designed to keep the distance between your foot and the rock as small as possible.

CLOSE TO THE GROUND

Our close-to-the-ground technology has succeeded in optimally adjusting platform and stack height to further enhance safety.

SHOCK ABSORBER

The integrated heel cushioning is set into the insole and results in more comfort and better rebound characteristics.

Stabilizers/shanks

SOFT STABILIZER

Nylon joint-stabilizing element offers optimal support for recreational activity.

MEDIUM STABILIZER

Nylon joint-stabilizing element offers optimal support for outdoor activities.

HARD STABILIZER

Nylon joint-stabilizing element offers perfect support for more intense outdoor activities.

SOFT SHANK

This lightweight insole provides optimal flex in footwear for easy hiking and leisure use.

MEDIUM SHANK

This sturdy insole provides good support in footwear for trekking tours with lighter packs.

Stabilizers/shanks

HARD SHANK

This sturdy insole provides good support in footwear for trekking tours with lighter packs.

HARD WINTER SHANK

Sturdy insole with an additional insulating layer for good stability on difficult terrain and protection from the cold at low temperatures.

I-CORE

The "I-Core" carbon insert forms the intelligent core of the sole construction. Perfect flex and torsional stability is achieved with precision alignment of the carbon fibres with the lever arm.

Upper technologies

LOWA FLEX®

Upper construction with freely moving lace hooks and other components for a more individualised fit to better adapt to personal comfort needs.

FLEXFIT®

Easier ankle movement due to integrated "FlexZone" and flexible Lace Loop.

FLEXFIT SYNCRO®

Asymmetrical upper construction for synchronised movement of the boot's shaft with the lower leg.

MINIMAL SEAMS

Construction design minimises the number of seams to prevent possible friction or pressure points.

2 ZONE LACING

Independently adjustable lacing zones, one on the forefoot and one on the upper, for an improved individualised fit and better adjustments for personal comfort and different foot anatomy.

Upper technologies

C4-TONGUE

Anatomically shaped tongue for improved flex and comfort that helps avoid pressure points in this area.

X-LACING®

Patented LOWA technology holds the tongue in place both vertically and horizontally. This prevents slippage and thus pressure points or blisters.

I-LOCK

Exclusive patented LOWA locking cam hooks for totally comfortable positioning of laces within the 2 Zone system.

ROLLER EYELETS

Metal eyelets with small rollers to minimise friction and ensure easy lacing.

WATERPROOF ZIPPER

A waterproof zipper protects from moisture and cold in extreme situations.

ZIPPER

For an easier instep we built in a zipper.

SLINGSHOT

Adapted from climbing technology, the slingshot heel stems from the experience of perfect heel fit.

FIT WING

The LOWA fit wing creates the ideal tensioning direction for more control at the heel.

ADJUSTABLE TONGUE

Perfect tongue placement and fit with adjustable tongue construction for personal fine-tuning.

FIT RIBBON

This minimalist lacing system combines the highest performance with maximum weight reduction.

Upper technologies

DOUBLE SPEED LACE

The use of two laces enables adjustment at both the forefoot and rearfoot zones at the same time.

BOA® SYSTEM

The BOA® SYSTEM, delivers closure solutions purpose-built for performance. A micro-adjustable dial, super-strong laces and low friction lace guides optimize fit and provide precision, adaptability, and control.

Materials

GORE-TEX®

Highly breathable, durably waterproof lining material. Keeps feet pleasantly dry and offers optimised climate comfort for a broad range of outdoor activities.

GORE-TEX® Panda

GORE-TEX® membrane with additional warm lining (100% polyester) keeps feet warm and dry during normal winter conditions.

GORE-TEX® Partelana

GORE-TEX® membrane with additional warm lining (80% polyester/ 20% wool) keeps feet warm and dry during cold weather.

GORE-TEX® Duratherm

GORE-TEX® membrane with insulating layer of lining ensures warm and dry feet during cold weather.

Materials

PRIMALOFT® 200

The most premium synthetic insulation with a weight of 200g/m² for warm feet in wintry conditions.

PRIMALOFT® 400

The most premium synthetic insulation with a weight of 400g/m² for warm feet in extreme winter cold.

LEATHER LINING

This lining provides pleasant comfort for your foot and good temperature management. Fit, durability and its ability to absorb moisture make a leather lining the optimal choice for comfort-oriented consumers.

TEXTILE LINING

A fabric or synthetic lining makes footwear lightweight and breathable. Good abrasion resistance speaks for itself and ensures durability. In addition, it offers outstanding temperature management.
