THE ORIGINAL SINCE 1980

THE ROLLERBLADE® EXPERIENCE

THE OFFICIAL RESOURCE FOR EVERYTHING SKATING.

Our website provides a wealth of information to share and enhance the experience of inline skating. When visiting The Rollerblade® Experience, one can choose from a variety of categories to help them get rolling as quickly and safely as possible. To name a few:

CHOOSING SKATES

which models could be best for the desired usage and skating needs

SKILLS

strides, stopping, turns

SKATE MAINTENANCE

inspecting skates, rotating wheels, replacing brake pads

TRAINING

tips for skating a marathon

EVENTS

Find skating marathons and inline contests around the world

NEWS

Learn about our team riders, skate related stories and how to connect with other skaters

ROLLERBLADE® TV

Check out the latest videos made by our skaters

FIND A ROLLERBLADE® RETAILER

search local and on-line dealers

The official Rollerblade® International Facebook page engages consumers to chat with us and with eachother about skates, places, tips, workouts, events and where to buy.

Consumers ask questions, make suggestions and provide us with ongoing dialogue on a daily basis.

This interaction helps us keep the pulse of skating going with a broader perspective and understanding of trends, opinions and needs from all around the world.

BENEFITS OF INLINE SKATING

AEROBIC
BUILDS AEROBIC EXERCISE
BENEFITS

Inline skating increases your heart rate and gets your lungs working, both components in aerobic exercise. You can increase these aerobic benefits by skating on an incline, skating more vigorously, or practicing interval skating. Aerobic exercise improves the cardiovascular system, reducing the risk of heart disease, stroke, and high blood pressure.

MUSCLE TONE
BUILDS ANAEROBIC EXERCISE
BENEFITS

Inline skating provides anaerobic benefits, such as muscle strengthening and toning. Lower body muscles, core muscles, and even the upper body muscles receive an effective workout while inline skating. From long leg strides, maintaining posture, and swinging the arms, the entire body will see the muscular benefits.

BALANCE
IMPROVES DYNAMIC BALANCE,
COORDINATION & AGILITY

Inline skating is about dynamic balance, or balance while your body is in motion. By starting with the basic inline skating skills then learning to do more advanced moves on your skates, such as skating backwards, crossover turns, inline hockey, aggressive skating, and even yoga, you can challenge your balance, coordination, and agility.

CORE STRENGTH
INCREASES CORE STRENGTH

Postural, abdominal, and back extensor muscles, get a great workout while inline skating. With each push and glide motion, the core is activated to support the whole body providing stability allowing for dynamic balance. A strong core contributes to the effortless look a practiced skater demonstrates.

WEIGHT LOSS
WEIGHT LOSS
AND MAINTENANCE

Inline skating at 10mph on a regular basis not only burns about 6 calories a minute, or 360 calories an hour, but also turns fat into muscle - a double benefit. Also, the faster you skate, the more calories you'll burn per minute.

LOW IMPACT
LOW IMPACT EXERCISE

While skating has the bone density enhancing benefits of being a weight bearing activity, the smooth push and glide motion has minimal impact on the joints.

SELF-CONFIDENCE
INCREASES SELF-CONFIDENCE

Probably the greatest fitness benefit of all is that inline skating is fun and gives you a sense of accomplishment as you tackle new fitness challenges. There are so many great inline skate events around the country in which to participate; from races to tours to local skate nights to so much more. Get out there and have fun getting and staying fit!

ABT: ACTIVE BRAKE TECHNOLOGY - BRAKING REINVENTED

SKATE WITH CONFIDENCE.

**MORE STABILITY
WHILE BRAKING
EASIER TO STOP**

**EASY-TOOL LESS BRAKE
MACRO ADJUSTMENT
CONSISTENT BRAKING
DURING WEAR**

**4 WHEELS ON THE GROUND
WHILE BRAKING
BRAKE WITH MORE BALANCE
AND MORE CONTROL**

One of the challenges of some skaters is to skate and stop with confidence and control. Rollerblade® addressed those concerns and introduces the enhanced ABT, Active Brake Technology. ABT is specifically designed for those who need the extra balance and support when beginning. It is the ultimate confidence builder and provides the ideal stability when braking because it allows the skater to keep all wheels on the ground and the brake at a consistent height for maximum power. This technology is paired with the extremely comfortable Macroblade family of skates, reinforcing Rollerblade®'s status as the industry leader.
